

## LAND SUPPLIER OPERATIONS DIRECTORATE (DSCC-FL)

### MISSION:

DSCC-FL mission is to provide DOD with worldwide integrated supply chain solutions for land weapon systems.

### FUNCTIONS:

1. Responsible for acquisition and supply support of land vehicles and combat systems.
2. Responsible for supply and logistical support of land vehicle and combat systems.
3. Perform quality and technical assurance on land weapons system items of supply.
4. Collaborate with external agencies in matters related to procurement and technical support of land items of supply.

## TACTICAL WHEELED VEHICLES DIVISION (DSCC-FLB)

### MISSION:

DSCC-FLB mission is to provide DOD with worldwide integrated supply chain solutions for land wheeled vehicle systems.

### FUNCTIONS:

1. Responsible for all integrated logistics support for tactical wheeled vehicles including the Mine Resistant Ambush Protected (MRAP) Vehicles. Perform inventory management and technical operations functions involving replenishment and special program requirements to include integrated determinations and decisions on general supply requirements, stock distribution, and supply funds management.
2. Execute best value decisions related to procurement actions and actively engage with supplier base to reduce logistics response time and backorders.
3. Continually seek and develop new sources of supply through coordination with source development specialist and the Small Business Administration.
4. Conduct engineering sustainment and technical activities that reduce total ownership cost or improve readiness of existing systems.
5. Partner with Land Customer Operations, Army customer support representatives, and industry to coordinate proper forecasting to ensure procurement actions support depot programs and military operational requirements.

## WHEELED VEHICLE IST (DSCC-FLBA)

### MISSION:

Our mission is to provide DOD with worldwide integrated supply chain solutions for land wheeled vehicle weapon systems.

### FUNCTIONS:

1. Manages multifunctional teams that are responsible for wheeled vehicle weapon systems and federal stock classes (FSCs).
2. Develops and reviews management reports and indicators by weapon system and directs actions necessary to ensure meeting supply availability goals.
3. Identifies recurring supply problems/recommends corrective action(s). Develops and maintains records of recurring supply problems on a systematic basis; identifies trends; conducts studies to establish causes; identifies and recommends corrective actions.
4. Participates, as directed and in concert with HQ DLA, with the Military Services in preparing Integrated Logistic Support plans and in materiel readiness reviews to determine effectiveness of DLA support to weapon systems.

## MINE RESISTANT AMBUSH PROTECTANT (MRAP) AND VEHICLE SUPPORT IST (DSCC-FLBB)

### MISSION:

Our mission is to provide DOD with worldwide integrated supply chain solutions for land MRAP vehicle weapon systems.

### FUNCTIONS:

1. Manages multifunctional core teams that are responsible for MRAP, various weapon systems and FSCs.
2. Reviews management reports and indicators by weapon system and directs actions necessary to ensure meeting supply availability goals.
3. Identifies recurring supply problems/recommends corrective action(s). Develops and maintains records of recurring supply problems on a systematic basis; identifies trends; conducts studies to establish causes; identifies and recommends corrective actions.
4. Intensively manages critical supply problems. Manages and controls high priority supply projects and back orders.

## VEHICLE SUPPORT IST II (DSCC-FLBC)

### MISSION:

Our mission is to provide DOD with worldwide integrated supply chain solutions for land vehicle and vehicle support systems.

### FUNCTIONS:

1. Manages multifunctional core teams that are responsible for MRAP, various weapon systems and FSCs.
2. Reviews management reports and indicators by weapon system and directs actions necessary to ensure meeting supply availability goals.
3. Identifies recurring supply problems/recommends corrective action(s). Develops and maintains records of recurring supply problems on a systematic basis; identifies trends; conducts studies to establish causes; identifies and recommends corrective actions.
4. Intensively manages critical supply problems. Manages and controls high priority supply projects and back orders.

## TIRES IST (DSCC-FLBE)

### MISSION:

Our mission is to provide DOD with worldwide integrated supply chain solutions Tire and Tire Products.

### FUNCTIONS:

1. Manages multifunctional core teams that are responsible for Tires and Tire Product FSCs. Reviews management reports associated with tire privatization and direct actions necessary to ensure meeting supply availability goals.
2. Identifies recurring supply problems/recommends corrective action(s). Develops and maintains records of recurring supply problems on a systematic basis; identifies trends; conducts studies to establish causes; identifies and recommends corrective actions.
3. Intensively manages critical supply problems. Manages and controls high priority supply projects and back orders.

## COMBAT VEHICLES ENGINES AND ARMAMENT DIVISION (DSCC-FLD)

### MISSION:

Our mission is to provide DOD with worldwide integrated supply chain solutions for land tracked vehicle weapon systems.

#### FUNCTIONS:

1. Responsible for maintaining spare parts support on tracked vehicles and small arms for the military customer.
2. Responsible for spare (non-reparable) parts support on tracked vehicles, primarily the M1 Abrams tank.
3. Primary responsibility consists of small arms and engine support.
4. Partner with Land Customer Operations, Army customer support representatives and industry to coordinate proper forecasting to ensure procurement actions support depot programs and military operational requirements.

#### COMBACT VEHICLES AND ARMAMENT IST (DSCC-FLDA)

##### MISSION:

DSCC-FLDA mission is to provide DOD with worldwide integrated supply chain solutions for land tracked vehicles and armament systems.

##### FUNCTIONS:

1. Manages multifunctional core teams that are responsible for MRAP, various weapon systems and FSCs.
2. Reviews management reports and indicators by weapon system and directs actions necessary to ensure meeting supply availability goals.
3. Identifies recurring supply problems/recommends corrective action(s). Develops and maintains records of recurring supply problems on a systematic basis; identifies trends; conducts studies to establish causes; identifies and recommends corrective actions.
4. Intensively manages critical supply problems. Manages and controls high priority supply projects and back orders.

#### ENGINES IST (DSCC-FLDB)

##### MISSION:

DSCC-FLDB mission is to provide DOD with worldwide integrated supply chain solutions for land Vehicle Engine systems.

##### FUNCTIONS:

1. Manages multifunctional core teams that are responsible for Engines, various weapon systems and FSCs.
2. Reviews management reports and indicators by weapon system and directs actions necessary to ensure meeting supply availability goals.
3. Identifies recurring supply problems/recommends corrective action(s). Develops and maintains records of recurring supply problems on a systematic basis; identifies trends; conducts studies to establish causes; identifies and recommends corrective actions.
4. Intensively manages critical supply problems. Manages and controls high priority supply projects and back orders.

#### SMALL ARMS IST (DSCC-FLDC)

##### MISSION:

Our mission is to provide DOD with worldwide integrated supply chain solutions for land small arms and support systems.

##### FUNCTIONS:

1. Manages multifunctional core teams that are responsible for Small Arms, various weapon systems and FSCs.
2. Reviews management reports and indicators by weapon system and directs actions necessary to ensure meeting supply availability goals.
3. Identifies recurring supply problems/recommends corrective action(s). Develops and maintains records of recurring supply problems on a systematic basis; identifies trends; conducts studies to establish causes; identifies and recommends corrective actions.
4. Intensively manages critical supply problems. Manages and controls high priority supply projects and back orders.

#### STRATEGIC MATERIAL SOURCING GROUP (MSG) DIVISION (DSCC-FLG)

##### MISSION:

DSCC-FLG mission is to provide DOD with worldwide integrated supply chain solutions for Tailored Support Initiatives.

##### FUNCTIONS:

1. Execute all Tailored Support Initiatives ie. Fleet Automotive Support Initiative (FASI), Reverse Osmosis Water Purification Unit (ROWPU), etc.

2. Formulate multiple NSN's into Family Groupings to award on Long Term Contract such as Strategic Material Sourcing (SMS), Key Item Driver (KID) 1.
3. Coordinate and award Supply Chain corporate contracts
4. Perform all contract administration for the Land Directorate

## TAILORED SUPPORT BRANCH I (DSCC-FLGA)

### MISSION:

DSCC-FLGA mission is to provide DOD with worldwide integrated supply chain solutions for Tailored Support Initiatives.

### FUNCTIONS:

1. Conducts customer research to determine the need for new or improved methods of supporting customer requirements. This work includes reviewing and prioritizing the customer base; identifying customer requirements including surge and sustainment; developing an in-depth understanding of customer operations, infrastructure, and priorities; utilizing business acumen in gathering, developing, and analyzing customer data; and establishing customer-focused readiness goals and metrics.
2. Conducts market/industry research to create, expand, and maintain tailored support initiatives. Reviews and/or researches previously conducted Benchmarking and other customer related studies to identify current practices and trends in the marketplace. Investigates market/industry information available from universities, institutes, and other academic and professional organizations. Conducts contractor site visits to gain first-hand knowledge and corroborate information gained from other sources. Documents and disseminates market/industry information gathered throughout all Tailored Support Teams (TSTs) and supporting Teams/Groups by contributing to a local market research results repository and network. Reviews market/industry within DLA business practices and proposes needed changes in local, agency, and department policies when current practices fail to meet current or future market/industry trends.
3. Uses all available approaches to evaluate the supply chain and explore logistic solutions for individual and customer groups. Identifies customer supply chain constraints and verifies customer requirements and forecasts. Determines total support baseline to establish current level of support and opportunities for increased support. Determines business implications by reviewing customer market share impact in comparison to cost benefit and feasibility analyses through detailed logistics modeling and evaluating the impact with all affected local and agency operations. Formulates and screens possible tailored support courses of action against all available information and conducts roll-out analysis with customer input to determine the best tailored support solutions.

4. Develops and finalizes customer tailored support strategies. Finalizes Basic Contract Administrator (BCAs) and completes transition, material management, and acquisition plans. Facilitates the complete supply chain partnership and commitment of affected customers, vendors, DLA Headquarters and other Inventory Control Point (ICPs). Obtains approvals and submits applicable system change requests (SCR).
5. Implements tailored support strategies. Drafts Statements of Work (SOW) with customer input and develops source selection and planning teams. Defines contractor performance metrics. Prepares solicitations and evaluates offers. Completes total ownership cost analyses and conducts negotiations. Prepares and awards contracts.
6. Performs acquisition management. Prepares for Contract activations (ramp-up) and ensures completion of applicable system changes. Implements any applicable rollout plans, monitors contractor performance, and maintains/administers contracts. Resolves any customer support issues. Completes contract closeouts. Monitors and assesses the success of tailored support solutions, maintains contract actions and lessons learned documentation, and disseminates all available information to other workgroups.

## TAILORED SUPPORT BRANCH II (DSCC-FLGB)

### MISSION:

DSCC-FLGB mission is to provide DOD with worldwide integrated supply chain solutions for Tailored Support Initiatives.

### FUNCTIONS:

1. Conducts market/industry research to create, expand, and maintain long term contractual support. Reviews and/or researches previously conducted Benchmarking and other customer related studies to identify current practices and trends in the marketplace. Investigates market/industry information available from universities, institutes, and other academic and professional organizations. Conducts contractor site visits to gain first-hand knowledge and corroborate information gained from other sources. Documents and disseminates market/industry information gathered throughout the Agency as well as supporting Teams/Groups by contributing to a local market research results repository and network. Reviews market/industry within DLA business practices and proposes needed changes in local, agency, and department policies when current practices fail to meet current or future market/industry trends.
2. Uses all available approaches to evaluate the supply chain and explore logistic solutions for individual and customer groups. Identifies customer supply chain constraints and verifies customer requirements and forecasts. Determines total support baseline to establish current level of support and opportunities for increased support. Determines business implications by reviewing customer market share impact in comparison to cost benefit and feasibility analyses through detailed

logistics modeling and evaluating the impact with all affected local and agency operations.

3. Performs acquisition management. Prepares for Contract activations (ramp-up) and ensures completion of applicable system changes. Implements any applicable rollout plans, monitors contractor performance, and maintains/administers contracts. Resolves any customer support issues. Completes contract closeouts. Monitors and assesses the success of tailored support solutions, maintains contract actions and lessons learned documentation, and disseminates all available information to other workgroups

## LONG TERM CONTRACT (LTC) BRANCH (DSCC-FLGC)

### MISSION:

Our mission is to provide DOD with worldwide integrated supply chain solutions for land weapon systems with emphasis on Long Term Contractual relationships

### FUNCTIONS:

1. Develops complex long-term contracts such as Corporate Contracts or significantly large groupings of items based on manufacturing characteristics or manufacturer. These contracts may become part of the DSCC Supply Chain utilized by various Tailored Support Arrangements (TSAs) or become their own tailored support for some customers.
2. Conducts customer research to determine the need for new or improved methods of supporting customer requirements. This work includes reviewing and prioritizing the customer base; identifying customer requirements including surge and sustainment; developing an in-depth understanding of customer operations, infrastructure, and priorities; utilizing business acumen in gathering, developing, and analyzing customer data; and establishing customer-focused readiness goals and metrics.
3. Conducts market/industry research to create, expand, and maintain long term contractual support. Reviews and/or researches previously conducted Benchmarking and other customer related studies to identify current practices and trends in the marketplace. Investigates market/industry information available from universities, institutes, and other academic and professional organizations. Conducts contractor site visits to gain first-hand knowledge and corroborate information gained from other sources. Documents and disseminates market/industry information gathered throughout the Agency as well as supporting Teams/Groups by contributing to a local market research results repository and network. Reviews market/industry within DLA business practices and proposes needed changes in local, agency, and

department policies when current practices fail to meet current or future market/industry trends.

4. Uses all available approaches to evaluate the supply chain and explore logistic solutions for individual and customer groups. Identifies customer supply chain constraints and verifies customer requirements and forecasts. Determines total support baseline to establish current level of support and opportunities for increased support. Determines business implications by reviewing customer market share impact in comparison to cost benefit and feasibility analyses through detailed logistics modeling and evaluating the impact with all affected local and agency operations.

#### KITTING BRANCH (DSCC-FLGD)

##### MISSION:

DSCC-FLGD mission is to provide DOD with worldwide integrated supply chain solutions for land weapon system Kits.

FUNCTION: Provide tailored support and management of enterprise kits and kitting products.

#### SUPPLIER RELATIONSHIP MANAGEMENT (SRM) BRANCH (DSCC-FLGE)

##### MISSION:

DSCC-FLGE mission is to provide DOD with worldwide integrated supply chain solutions for land weapon systems through collaborative relationships with suppliers.

FUNCTION: Provide better consolidation of the conception, information gathering, realization, and management of Long Term Contracts and Corporate Contracts, and Tailored Support Initiatives in a single, focused Unit with the Contract Administration Team complementing the effort by taking advantage of their unique orientation along State lines. Overall, the Acquisition and Administration Unit provides emphasis on achieving long term, best value contractual relationships and detailed, proactive administration of all Land's contracts.

#### DOD ELECTRONIC MALL (EMALL) CONTRACTING BRANCH (DSCC-FLGF)

##### MISSION:

To provide the warfighter easy access to a single web-based ordering/tracking application to acquire off-the-shelf, finished goods and services based on price, delivery, and product description, from the commercial marketplace and government sources.

FUNCTION: The DOD EMALL Contracting Office writes contracts, issues awards and provide maintenance for DLA contracts on DOD EMALL .

#### SUPPLIER SUPPORT DIVISION (DSCC-FLS)

##### MISSION:

Our mission is to provide Administrative, Contract Administration, Consultative and Emergent Procurement Support to the Land supply chain.

##### FUNCTIONS:

1. Build and maintain collaborative relationships with suppliers to allow DLA to be more responsive to customer needs.
2. Improve supplier communication, collaboration and cooperation to improve efficiency and effectiveness.
3. Reduce total cost of ownership for procured goods and improved service by partnering and integrating suppliers into business processes.
4. Build two-way supplier relationships to problem-solve, improve capabilities and streamline business processes.
5. Perform emergency and Non-NSN procurement actions to support the Land Directorate.
6. Provide administrative support to the Land Group as required by the Director and Center policies and procedures. Also, responsible for assisting Service customers in resolving high priority requisition problems. Has responsibility to analyze weapon system readiness and assist the Group in identifying critical degraders and recommend corrective action.

#### SHARED SERVICES BRANCH (DSCC-FLSA)

##### MISSION:

DSCC-FLSA mission is to provide Land with supply chain solutions for land weapon systems, and personnel, analytical and consultative support for the supply chain.

##### FUNCTIONS:

1. Participates in coordinating Weapons Systems conferences both on-Center and off-Center for functional responsibility to include participating in development and administration of interagency agreements.
2. Reviews proposed specifications, standards and handbooks; prepares comments and submits comments to focal point for consolidation and preparation of a coordinated DSC position.
3. Reviews DLA Fm 339s sent to the services for engineering support.

4. Participates in Technical Interchange Meetings (TIMs) and Engineering Support Cross Talk Meetings with the engineering support activities.
5. Monitors weapon systems provisioning transactions that include review, analysis of output products of the Provisioning Control File (PCF) and coordination among the Operations Support Group, Senior Executive Contracting Group personnel, and the submitting Military Services' Weapon Systems Support Program managers. Collaborates with the Military Service submitting activity and appropriate Operations Support Group, and contractors, as required, to ensure correct and adequate provisioning data in support of technical, cataloging and procurement personnel.
6. Participates in coordinating Weapons Systems conferences both on-Center and off-Center to include participating in development and administration of interagency agreements.
7. Executes emergency/high priority projects from DLA.
8. Identifies recurring supply problems/recommends corrective action(s). Develops and maintains records of recurring supply problems on a systematic basis; identifies trends; conducts studies to establish causes; identifies and recommends corrective actions.

#### EMERGENCY BUY AND NON-NSN TEAM (DSCC-FLSAB)

##### MISSION:

DSCC-FLSAB mission is to provide DOD with worldwide integrated supply chain solutions for Emergent and Non-NSN requirements..

##### FUNCTIONS:

1. Executes emergency/high priority projects from DLA.
2. Identifies recurring supply problems/recommends corrective action(s). Develops and maintains records of recurring supply problems on a systematic basis; identifies trends; conducts studies to establish causes; identifies and recommends corrective actions.

#### POST AWARD BRANCH (DSCC-FLSE), POST AWARD TEAM I (DSCC-FLSEA), POST AWARD TEAM II (DSCC-FLSEB), POST AWARD III (DSCC-FLSEC)

##### MISSION:

DSCC-FLSE mission is to provide The Land Supply Chain with integrated contract administration solutions for land weapon systems.

##### FUNCTIONS:

1. Conducts negotiations on price, delivery and other contractual provisions.
2. Issues contract modifications for Small Business/Labor Surplus Area Set Aside Awards and Option Exercises.
3. Assumes PCO functions immediately after awards have been issued; responds as PCO to all inquiries from contractor CAS elements, and requisitioning activities.
4. Performs post award actions as noted below and as otherwise provided in the DFARS, FAR and implementing guidance.
5. Administers contractor claims and waivers; resolves contract disputes. In the role of PCO attends Armed Services Contract Review Board hearings on contract disputes.
6. Reviews and approves changes to contracts. Issues contract and purchase order modifications, change orders, supplemental agreements and shipment diversions. (Small Business/Labor Surplus Area Set-Asides and Option Exercises and contract modification affecting new acquisition will be issued by the appropriate office.)
